

BOWLING for Turkeys

In November, temperatures start to drop, and we spend more time inside with our little ones. When they need to burn off some energy, take them Bowling for Turkeys right in your own home! This fun activity is a fun way to **PLAY** while helping your child practice their hand eye coordination skills. You can make your “turkey pins” as simple or as fancy as you’d like!

Materials Needed:

- Large plastic cups - any color will work, but choose brown if you are creating turkeys!
- A “bowling ball”- this could be a plastic ball you have at home, or some bowlers even use mini pumpkins!

Other Materials Just for Fun:

- Construction paper
- Tape and/or glue
- Googly eyes or stickers

Make a Thankful Tree:

1. Create your bowling pins! Keep it simple and use the large plastic cups without decoration, or add some decoration to turn the cups into turkeys:
 - Add a tailfeather using construction paper
 - Add a beak using construction paper or a sticker
 - Add eyes using googly eyes or sticker eyes
2. Set up your bowling pins in a triangle in the shape of bowling placement:
3. Start bowling!
